

PLAY GOC

A Token Based Incentivized Gaming Platform

The core belief in everything we do is that blockchain technology and the things we build on the TRON Network should be fun. We want our users to come to our platform and have a wide variety of games and activities that they can launch into and play with their tokens.

Our goal is to launch dozens of games and create fun and exciting ways to interact with them and each other on our platform and with our tokens.

Users will be able to play games with PLAY, TRX, GOC, and many more.

Mining Reward (RWD) is another central aspect to this platform that will bring longevity and exciting rewards to the users for years to come.

We expand on these ideas and more below.

PLAY Token

PLAY Token

This is the primary token that runs through the entire platform.

- PLAY has the best mining rate out of the three mining-enabled tokens.
- Total supply is 10 billion.
- Circulating supply is 4.5 billion.
- 1.5 billion is reserved to bankroll the casino.
- 4 billion are locked until 2021, after which they will be used strategically to enhance the PLAY GOC ecosystem.

BUYING PLAY

- PLAY is listed on the GOC exchange <https://market.goc.network/en/exchange/v2?id=33>

REWARD Token

REWARD (RWD)

- REWARD (RWD) tokens are earned by playing games with PLAY, TRX, GOC, and other tokens.
- Total supply is 1,000,000,000 (1 billion) tokens, with 80% distributed as part of the mining and airdrop system.
- The remaining 20% of RWD is used for special events such as leaderboard competitions and promotional partnerships.
- RWD is also airdropped to everyone who has at least 1 million PLAY tokens deposited in their site wallet and scales up in increments of 1 million.
- For every 0.6 RWD mined, 0.6 RWD goes to the player. The player gets 100% of the RWD that they mine. An extra 0.25 RWD is mined to the house and an extra 0.15 RWD is mined to the airdrop pool.
- You can redeem RWD for Reward Party tickets and other on-platform items.

MINING

- "Mining" is the term for playing the games with PLAY, TRX, GOC and other tokens to earn RWD tokens.
- As more RWD is mined the difficulty increases with a total of 250 levels of difficulty.
- Mining difficulty is scaled up for all connected tokens at once. Mining efficiency is adjusted based on price changes before the start of a new Reward Party. 'Mining boosts' may be applied to tokens at our discretion.

AIRDROPS

- 15% of all mined RWD are put into a pool for airdrops to people who hold PLAY.
- Airdrops are based on deposited increments of 1,000,000 PLAY.
- The PLAY must be deposited onto the platform in order to be eligible for airdrops.
- Airdrops are distributed from the pool at a random time each day.

REWARD PARTY

- 100% of house profits (in PLAY, TRX, and GOC and other tokens) make up the prize pool for the Reward Party.
- Spend RWD tokens on tickets, which give you a proportional share of the prize pool compared to total tickets bought.
- Each RWD Party begins and ends every 24 hours with shares proportionally paid-out to ticket holders.
- Tickets only last for the reward period in which you bought them.
- All RWD spent on the parties are permanently burned.

MINING TABLE

- Subject to mining rate adjustments based on price changes to keep relative rates stable

ROUND	BASE TRX VALUE	TRX/RWD	PLAY/RWD	GOC/RWD	TOTAL RWD MINED
